Pet Adoption & Shelter Management System

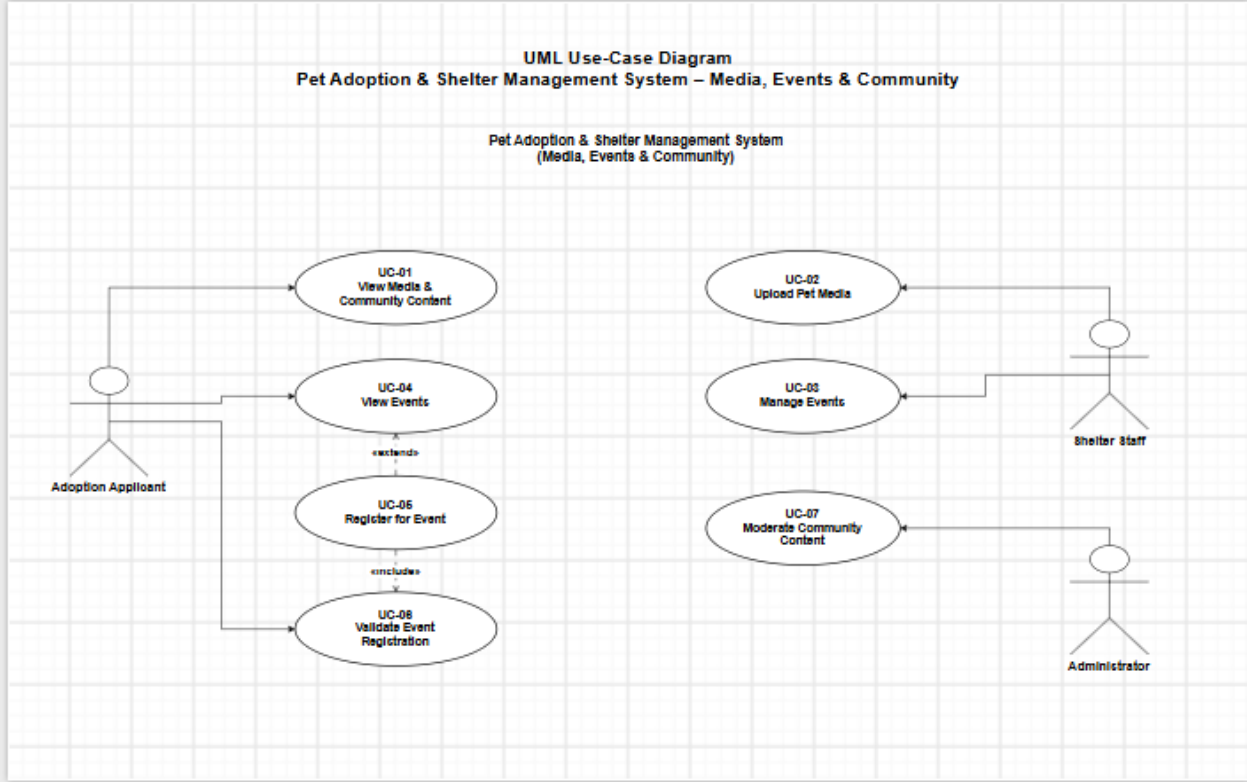

REQUIREMENTS ENGINEERING

1. FUNCTIONAL & NON-FUNCTIONAL REQUIREMENTS

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale
FR-001	Functional	The system shall allow Adoption Applicants to view published pet media and community content.	High	When an Adoption Applicant opens the Media & Community section, all currently published content shall be displayed.	Helps applicants stay informed about pets and shelter activities.
FR-002	Functional	The system shall allow Shelter Staff to upload and publish pet-related media.	High	When authorized Shelter Staff upload a valid media file and select Publish, the media shall appear in the published media section.	Enables staff to share useful information about shelter pets.
FR-003	Functional	The system shall allow Shelter Staff to create, update, and manage shelter events.	High	When valid event details are submitted by Shelter Staff, the event shall appear in the upcoming events list and be available for further management.	Supports organized communication of shelter events.
FR-004	Functional	The system shall allow Adoption Applicants to register for available shelter events.	High	When an applicant selects an available event and completes registration, the system shall display a registration confirmation.	Allows applicants to participate in shelter activities.
FR-005	Functional	The system shall allow Administrators to moderate published community content.	Medium	When an Administrator removes a community post, the post shall no longer be visible to Adoption Applicants.	Helps maintain appropriate and relevant community content.
NFR-001	Nonfunctional	The system shall display Media, Events & Community pages within 3 seconds under normal operating conditions.	High	At least 9 out of 10 page-load tests shall complete within 3 seconds.	Ensures a responsive user experience.
NFR-002	Nonfunctional	The system shall restrict content management operations to authorized Shelter Staff and Administrators.	High	An unauthorized Adoption Applicant attempting to modify content shall be denied access in 100% of test attempts.	Protects system content from unauthorized modification.

2. UML Use-Case Diagram

Model all actors, primary use cases, and include at least one «include» and one «extend» relationship.

3. Use-Case Flow Specification

Use Case: Register for Event

Use Case ID: UC-05
Primary Actor: Adoption Applicant

1. Preconditions

- The Adoption Applicant is logged into the Pet Adoption & Shelter Management System.
- The Events section is accessible.
- The selected shelter event is published and open for registration.
- Registration slots are available for the selected event.

2. Postconditions

- The Adoption Applicant is successfully registered for the selected event.
- The system updates the available number of event slots.
- The system displays a registration confirmation to the applicant.

3. Main Success Scenario

1. The Adoption Applicant opens the **Events** section.
2. The system displays the list of available shelter events.
3. The applicant selects an event from the list.
4. The system displays the selected event's details and registration information.
5. The applicant selects the **Register** option.
6. The system validates the applicant's registration details.
7. The system checks the availability of registration slots.
8. The system registers the applicant for the selected event.
9. The system updates the event's available capacity.
10. The system displays a confirmation message indicating that the registration was successful.

4. Alternate Flow

AF-01: Event Registration is Full

1. The applicant selects the **Register** option for an event.
2. The system checks the event's registration capacity.
3. The system finds that all available registration slots are occupied.
4. The system does not complete the registration.
5. The system displays a message informing the applicant that the event is full.
6. The applicant is returned to the event list.
