PASMS-16 Preview Watermarked Artwork	Unassigned	deeraj	Medium	To Do

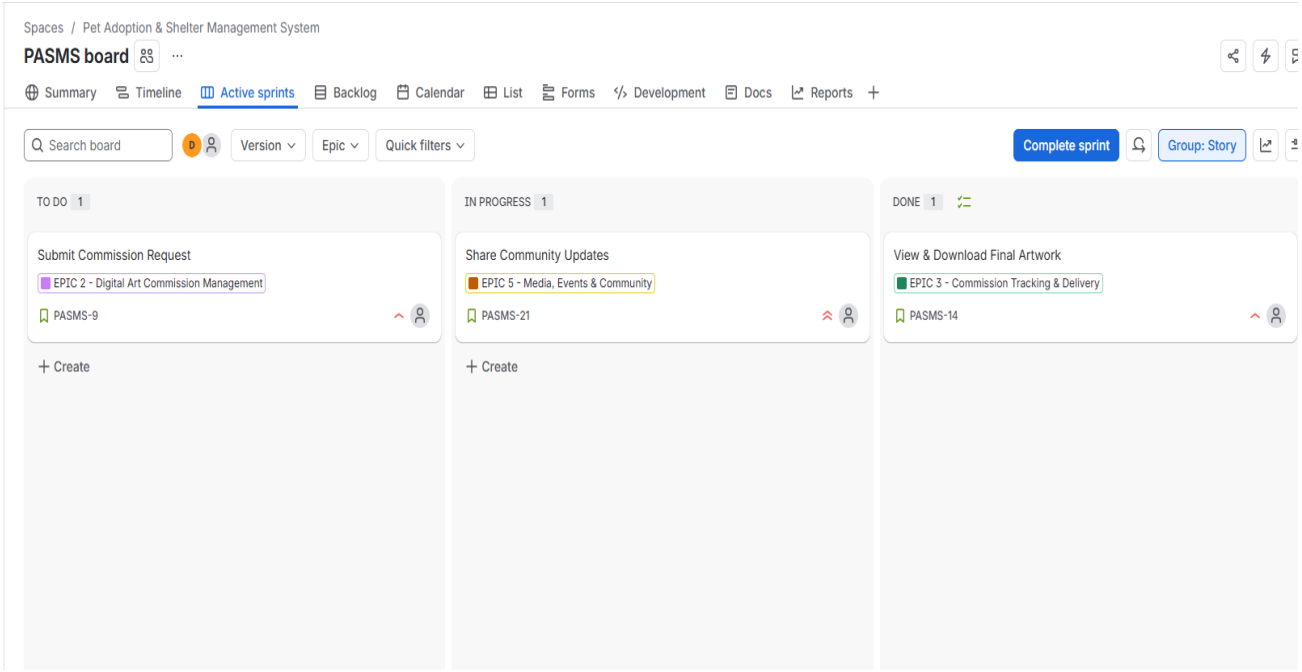

USER STORIES:-

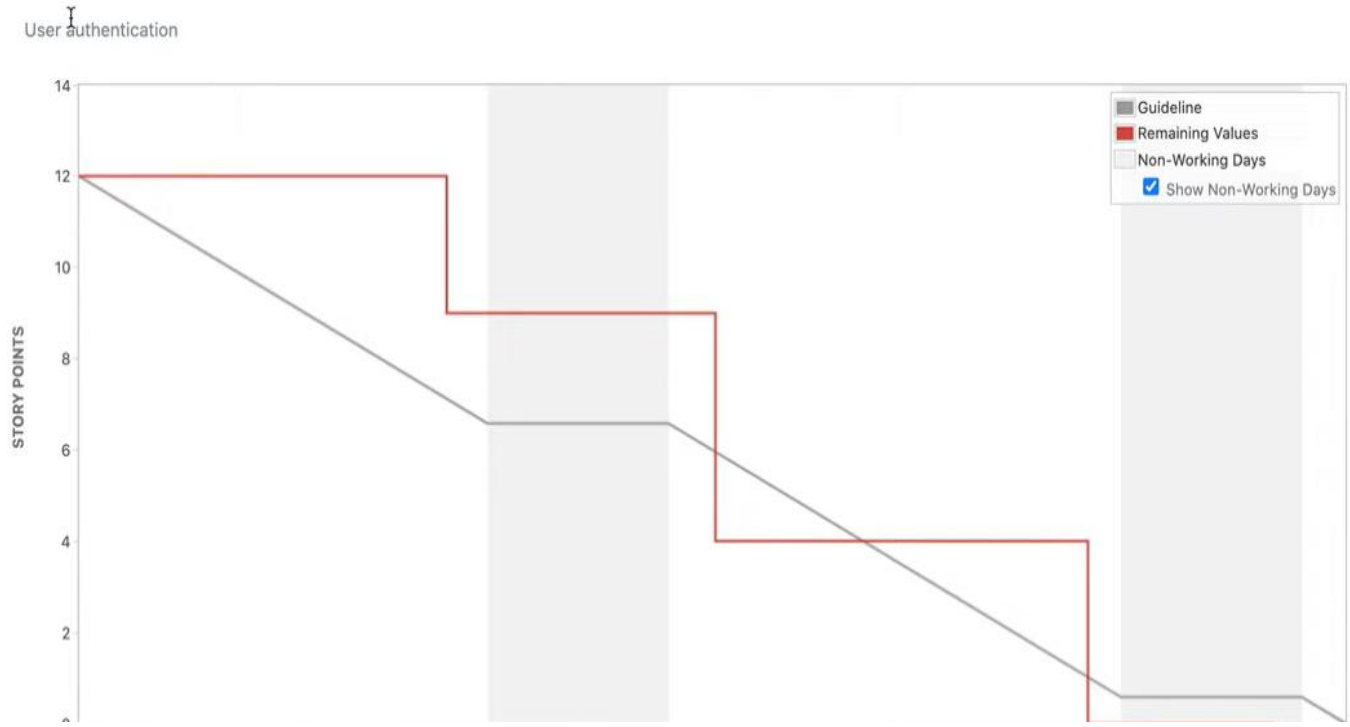

2 ory Point Assignments

3. Sprint Board / Active Sprint View

4. Burndown Chart

5. Brief Reflection Document answering the 4 reflection questions:

i. **Did your estimations reflect the actual effort?**
Yes, the story point estimations were reasonably close to the actual effort required. The Fibonacci scale helped us differentiate between simple, moderate, and complex tasks.

ii. **Was your backlog well-prioritized?**
Yes, the backlog was prioritized based on the importance of each feature to the users and the overall functionality of the system. High-priority features were planned earlier in the sprints.

iii. **How did your simulated sprint align with your plan?**
The simulated sprints generally followed the planned backlog and allowed us to track the progress of the selected user stories from **To Do → In Progress → Done**.

iv. **What insights did the burndown chart give about your team's capacity?**

The burndown chart helped us understand how quickly work was being completed during the sprint. It also showed the remaining workload and helped evaluate the team's progress and capacity.
